(In the space provided below, please explain in detail the reasons for the delay in filing a proper reply.)

Commissioner for Patents

There was an unavoidable delay in the filing of my response to the final office action in my patent. Here is the sequence of events and actions.

1. Final response faxed and mailed on the 14 April 2008.
2. Notice of Abandonment 21 August 2008.
3. I called and found out the final response had not been received by the examiner. I resent the final response on 5 September.
4. In December I called the examiner as I had not gotten a response. He still did not have the response. I called the patent office general number to trace down the response I found out why it had not gotten to the examiner.

The only explanation we could come up with was the application number was incorrectly typed on the final response. It was typed 10/550,994 not 10/550,944. The final response was not in the incorrect numbered file either. The response had become lost even though all other data was correct and the patent was easily found by the person helping me.

I was never notified of this error and would have corrected if I had known. This was not intentional.

Attached is proof of the filled final response with the application number error.

also attached is the final response with corrected application number.

Please waive any fees associated with this Petition.
